

Dennis Kim

AI-enabled Product Builder & Development Team Lead

Bayside, NY | me@dennis.kim | 929-919-6855 | [LinkedIn](#) | [Github](#) | [Blog](#)

Executive Profile

Product builder and team lead with 15+ years shipping data platforms, trading infrastructure, and AI/ML-powered financial systems into regulated production. Combines deep domain expertise in fixed income markets with modern AI agent workflows – accelerating spec authoring, code generation, data analysis, and task automation. Grew data business from **\$25MM to \$55MM+**, scaled CP+ to the firm's largest data product, and closed critical quality gaps from **95% to 99.9%**.

Core Expertise

AI-agent-assisted product development | Spec-to-code workflows | Data platform productization | Regulated production systems

Professional Experience

MarketAxess – New York, NY

Product Manager / Scrum Master – Quant Engineering & Fixed Income Calculations *Jun 2021 - Present*

- More than doubled the data business from **\$25MM to \$55MM+** through AI/ML data products.
- Grew **CP+**, the industry's leading real-time AI/ML fixed income pricing engine, from zero to MarketAxess's largest data product – representing **over a third of total data revenues**.
- Established the Global Fixed Income Calculations team, closing the quality and coverage gap from **95% to 99.9%** for critical market segments – and surpassing targets in newer markets.
- AI-assisted development: replaced a basic React interface with a modern web platform for calculation tooling – featuring saved calculation requests, customizable widgets, side-by-side comparison, and a Triage page centralizing disparate data for investigation. Collapsed multiple workstreams into one, and are now targeting a customer version to compete with Bloomberg's YAS screen.
- AI-assisted development: built a CLI tool for mass Jira creation via CSV/YAML and Atlassian APIs – reducing PI Planning entry from hours to seconds. Built as a personal tool, then expanded company-wide with reusable templates. Planning to open source.

Product Owner / Scrum Master – Quant Engineering *Aug 2019 - May 2021*

- Led MarketAxess's first pilot Agile team, whose results drove firm-wide adoption of the methodology.
- Launched **FINRA TRACE + MarketAxess Platform Context REST API** – MarketAxess's first AWS-native commercial product.
- Founded the firm's first cloud-native product organization, driving enterprise-wide adoption of AWS, data lake formation and streaming data architectures.

Business Analyst – Data Science Research *Jul 2017 - Jul 2019*

- Led the transition of CP+ from research project to product launch.

Tradeweb Markets – New York, NY

Vice President, Business Analysis / Product Lead – Retail and Institutional Trading Platforms *Mar 2015 - Jun 2017*

- Product execution lead for **Tradeweb Direct** retail fixed income ATS and enterprise advisory platforms.

- Delivered the redesign of **Portfolio Solutions** from concept through commercial launch – a municipal bond portfolio management and analytics platform adopted across institutional advisory firms.

Interactive Data (now ICE Data Services) – New York, NY

Product Management Business Analyst – Evaluated Pricing Division *Jan 2011 - Jan 2014*

- Product founder of **Vantage**, an award-winning web platform serving **2.8M+** daily evaluated fixed income prices to **5,000+** institutions.
- Designed and shipped industry-first analytical visualization systems, including Box Plot Market Data Graph, Price Validation Workflow, and FINRA Structured Trading Aggregate Reports.
- Won “**Best Information Display**” (2013 and 2014, *Systems in the City*).

Thomson Reuters (now LSEG Data and Analytics) – New York, NY

Market Data Analyst – Global Ticker Plant and Elektron Platform Migration *Mar 2008 - Dec 2010*

- Lead analyst on the global migration from legacy Thomson ticker plants to Reuters Elektron – defining business rules for institutional feeds (NYSE Euronext, LSE Millennium) and coordinating delivery across US, London, and Bangalore teams under strict uptime and data quality constraints.

Earlier Experience

Proprietary Equity Trader – Trillium Trading, LLC (2005-2007) Licensed market maker specializing in intraday momentum and technical trading strategies.

Technical Skills

AI agent engineering: Multi-agent orchestration, code generation and review, automated testing

AI-powered workflows: Spec authoring, context generation and curation, rapid application design and prototyping, task and deployment pipeline automation

Languages: Python, Rust, TypeScript, SQL, Ruby

Platforms & infrastructure: AWS, APIs, streaming data, distributed systems

Product & delivery: Scrum, Kanban, SAFe

ML systems: Predictive modeling, real-time inference pipelines

Education

The University of Chicago – A.B. Economics
